WHY KAILAS

Kailas Super Speciality Dental Clinic and Implant Centre, Kollam is an internationally renowned Dental Care Centre. Since its very inception, the clinic has achieved a reputation by providing quality dental care service at par with international standards. That's how we at Kailas, have won the confidence of more than 100,000 patients within a short span of time.

Once a great philosopher said, "a smile is worth a thousand words that speaks volumes about a person". But do we speak the language of smile with confidence? A random survey pins down that 40% of a person's beauty lies in his/her smile. But do we give it 100% attention? Kailas Dental Clinic is dedicated to add a zing of confidence in each smile and is committed to pay 100% attention to the problems of each patient. We strive to achieve the highest level of early detection and prevention of dental diseases and curative treatment. Our greatest strength is our highly ethical team of professionals who take care of even the smallest issue in detail in all dental diagnosis/treatment process. Our friendly and caring staff welcome every patient and make your every visit a pleasant experience.

KAILAS is a leading Dental Clinic bringing about the much awaited change in Indian Dental Healthcare system by introducing Advanced Dental Healthcare services, by providing a range of Speciality Dental Treatments, Quality Oral Care and Cosmetic Dental Services.

We welcome you to experience our ultra-modern facilities programmed to give you a brilliant and confident smile. We provide you the convenience and comfort of availing the entire specialist services of all branches of dentistry under one roof.

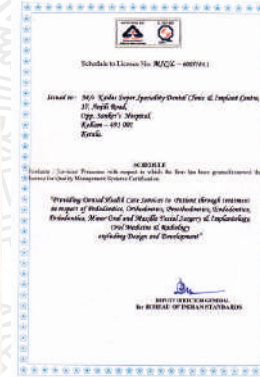

DR. C.S.SAJAN BDS
DIRECTOR & C.E.O.

Rajiv Gandhi National Quality Award 2007
recognition for efforts and commitment to
Quality in Health Care Sector

RECOGNITIONS & ACHIEVEMENTS

ACHIEVEMENTS

- First ever dental clinic in India to achieve Rajiv Gandhi National Quality Award from Govt of India for Quality Dental treatment at affordable cost.
- IS/ISO 9001-2008 (Govt of India BIS) accredited dental clinic – (License no. Msc/L 6005584.2)
- First ever dental clinic in Kerala with a digital oral Pantamogram (OPG) GENDEX, USA machine.
- RVG equipped dental cabins for implants and endodontic (planmeca and Shick)
- Most preferred dental clinic by tourists visiting Kerala (Dental tourism)
- American patented Brite Smile Tooth Whitening machine (one among the four dental clinics in kerala)
- ISO 9001-2015 in progress.
- On process of NABH Accreditation
- Certification from Government of India Atomic Energy Regulatory Board, Radiological Safety Division for X-ray OPG units.

SPECIAL EQUIPMENTS AND FEATURES AT KAILAS

Kailas Dental Clinic is equipped with the most advanced instruments and machinery. Hence we proudly call it an Advanced Super Speciality Dental Care Centre. We have installed each and every equipment required to make our clinic a one stop solution provider for World Class Complete Dental Care.

GENDEX D.P- 700 DIGITAL PANORAMIC SYSTEM

This is a software controlled diagnostic dental x-ray equipment for producing high quality digital images of Maxilla and Mandible all the teeth including the wisdom teeth, the fronto nasal and maxillary sinus and the T.M.J.

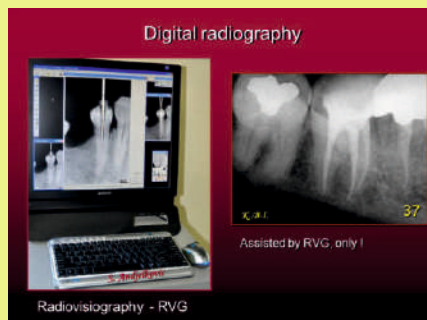

Diagnostic uses:

OPG are used by the Dentists to provide information on:

- Detection of impacted teeth providing proper diagnosis and treatment plan
- Periodontal bone loss and periapical involvement.
- Finding the source of dental pain
- Assessment for the placement of dental implants
- Orthodontic assessment. Pre and Post-operative
- Caries detection especially in the inter-dental region
- Diagnosis of developmental anomalies such as cherubism, cleidocranial dysplasia
- Carcinoma in relation to the jaws
- Temporomandibular joint dysfunction and ankylosis.
- Diagnosis of osteosarcoma, ameloblastoma, renalosteodystrophy affecting jaws, hypophosphatemia
- Diagnosis and detection of fractures or trauma

The most common use is to determine the status of wisdom teeth and trauma to the jaws. Kailas Super Speciality Dental Clinic and implant centre is the first ever dental clinic in Kerala that proudly installed GENDEX DP-700 from KAVO.

GENDEX
Imaging Excellence Since 1893

RADIO VISIO GRAPHY

RVG (Digital Radiography System) has the Highest Resolution Digital Imaging Sensor which gives big images with high resolution that helps confident diagnosis and ultimately adds to the quality of patient care.

Benefits: A more comfortable experience for the patient. Hassle free development of radiographic films compared to the conventional methods used. More convenient to take tooth radiograph during the procedure as and when

THE INTRA ORAL CAMERA

It is a powerful tool that enables detailed visual examinations (up to 40x magnification) of patient's tooth. We can explore and record images of the teeth and surrounding tissue for proper diagnosis and accurate treatment. The patients can appreciate "before and after" treatment changes.

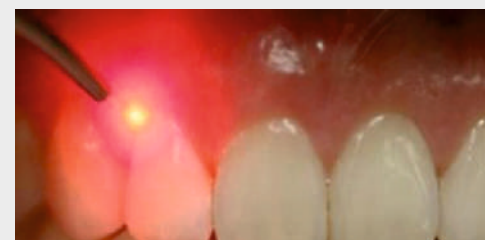

APEX LOCATOR

It is an electronic device used in endodontics to determine the length of the root canal space. By using this the success rate of the root canal treatment procedure will be very high.

FIBRO OPTIC HANDPIECES

They emit light to the working tip and is fully autoclavable. The light emitted at the working tip will give proper visibility to that area which enables dentists to have proper control over the cutting bur and to give precise tooth preparation.

LASER DENTISTRY

Dental lasers can decrease morbidity after surgery, and reduces the need of anesthetics. Because of the cauteriation of tissue there will be little bleeding following soft tissue procedures, and some of the risks of alternative electrosurgery procedures are avoided.

Benefits of Laser Dentistry.

- Procedures performed using soft tissue dental lasers may not require sutures (stitches)
- Certain laser dentistry procedures do not require anesthesia.
- Laser dentistry minimises bleeding because the high-energy light beam aids in the clotting (coagulation) of exposed blood vessels, thus inhibiting blood loss.
- Bacterial infections are minimised because the high-energy light beam sterilizes the area being worked on.
- Damage to surrounding tissue is minimised

Wounds heal faster and tissue can be regenerated

ROTARY ENDODONTIC SYSTEM

Rotary instruments are used in conjunction with dental handpieces for preparing root canals for root canal treatment. It reduces the working time on the patients and results in precise preparation of canals.

STERILIZATION PROTOCOL IN KAILAS

We have given great focus and attention to proper sterilization of dental instruments, as they are possible agents for pathogenic transmission from patient to patient, from patient to doctor and vice versa. At our Dental Clinic, we carry out all possible sterilization and disinfection procedures needed for infection control. This is provided to each and every patient to prevent the transmission of the AIDS virus, Tuberculosis, Hepatitis, tetanus and other infectious diseases.

We carry out 4 step sterilization standard for all non disposable items.

STEP 1:

The dental instruments are scrubbed thoroughly to discard debris.

STEP 2:

The dental instruments are then rinsed in ultrasonic cleaner.

STEP 3:

Autoclaving by STERLINE 9.5 class B sterilization system in compliance with international standardisation EN: 13060

Kailas is equipped with state of the art STERLINE 9.5 class B sterilization system. Even the internal surfaces of hand pieces can be sterilized. Self diagnosis & Trouble shooting system. First of it's kind in Kollam District.

STEP 4:

Packed sterilized instruments are kept in U.V. Chamber to maintain sterilization. To ensure a bacteria free environment at clinic we carry out fumigation process every week wherein, the whole clinic is treated with chemical fumes to see that the treatment environment remains bacteria free.

COMPREHENSIVE DENTAL CARE

Comprehensive oral rehabilitation is possible only by multi-speciality approach. We have redefined dental care by bringing all the dental specialities under one

ORTHODONTICS

Crowded and protruded teeth that affect the beauty and personality of an individual can be corrected by using fixed and removable orthodontic appliances. Age is not a bar for this treatment, provided you have healthy gums.

CERAMIC BRACKETS

Ceramic brackets are translucent, so they blend in with your natural true colour. This means that, unlike traditional stainless steel braces, ceramic braces does not make your smile metallic.

LINGUAL ORTHODONTICS

In lingual orthodontic technique specially designed brackets are placed on the inside surface of the teeth. So this procedure is visually appealing

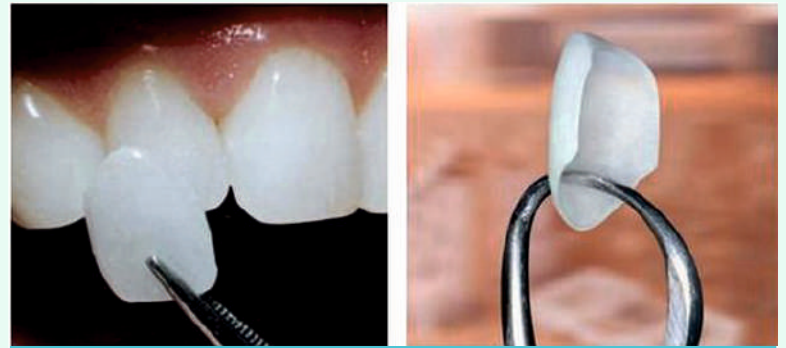

INVISALIGN

This is the invisible way to straighten your teeth without braces. It uses a series of clear removable aligners to straighten your teeth without metal wires or brackets. No one will be able to tell that you are straightening your teeth, and you will be able to eat and drink what ever you want while in treatment. Moreover, eating, brushing and flossing are no problem since they are removable. They are more comfortable to wear than braces since there is no metal or wires to cause mouth abrasions.

DENTAL CROWNS / BRIDGES:

Crown/Bridge has undergone a transformation over the last few years, thanks to 3D imagery and CAD-CAM systems. We are now able to create a more precise crown that is stronger and has a more natural and pleasant appearance. Metal free crown and bridges are fabricated in ISO certified labs in India as well as laboratories in Sweden.

DENTAL VENEERS:

Veneers are the latest and best option in creating a perfect and complete smile. If you have teeth that are chipped, worn down, misaligned, discoloured, or otherwise you are unsatisfied with the appearance, Veneers offer an excellent solution! Your first-class smile can be achieved in only 1-3 appointments. You no longer have to live with the embarrassment or discomfort of an unpleasant smile.

FULL MOUTH RECONSTRUCTION:

Combine several treatments to achieve a complete first-class smile makeover. During Consultation our cosmetic dental Specialist examine your smile, discuss with you the available options and give you personalized professional guidance that yields you the smile you desired.

ROOT CANAL TREATMENT:

There are very small canals within your tooth and they can become infected quite easily. Our Endodontist, who is a specialist in root canal treatment, will remove the infection by performing a root canal procedure. This is one of the safest and most effective methods of saving a damaged tooth.

GUM TREATMENT:

Gum disease or periodontal disease is a progressive inflammatory disease of the gingiva and the surrounding tissue and alveolar (bone) around the teeth. Periodontal disease is one of the major cause of tooth loss after the age of 30 and it is believed that around 80% of the population above the age of 30 may suffer from this disease, with varying degrees of severity.

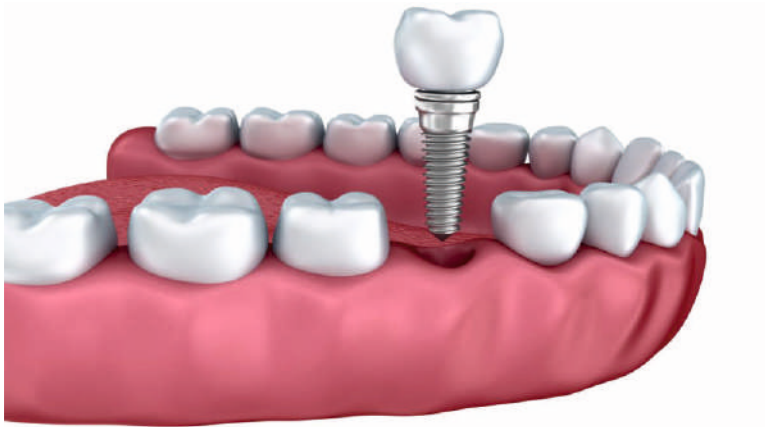

GUM RECONTOURING

A "gummy" smile can make teeth look short and unattractive. With the ease and comfort of an ordinary blade or a laser, gums can be reshaped to reveal a more appealing smile. The new technology, not only quickly sculpt excessive and uneven gums, but also immediately seals the tissue, helping the patient to heal faster and more comfortable. This procedure can be completed in a single visit.

ORAL AND MAXILLOFACIL SURGERY:

Orthognathic surgery: it's the surgical modification of the jaws for cosmetics reasons. An oral surgeon could reposition the bones of the face and jaw to a more aesthetically acceptable position. We follow W.H.O. protocol for sterilisation. Un avoidable extraction and surgical removal of cysts and tumours, management of trauma, removal of impacted teeth are a few of the surgical procedures performed in Kailas.

DENTAL IMPLANTS:

For some reasons, if teeth are to be extracted or removed, Implants can be used for replacement. It is the most advanced and bio-compatible alternative to natural teeth. Only implants offer 100% friction, compared to normal teeth. Loose dentures can be stabilised using implants. We use the implant system for Noble Bio care (Sweden), the pioneer in the field of dental implants.

TOOTH WHITENING

Tooth whitening can help to ward off the embarrassment of yellow teeth that show up as a result of natural aging process or discolouration due to stains occurred by over consumption of tea, coffee and cola. At Kailas we apply the latest harmless technology to whiten your teeth within an hour. The patented whitening machine (Brite Smile Teeth Whitening System) is the first of it's kind in Kerala. For more details please visit: www.britesmilewhitening.com

LASER TOOTH WHITENING

Laser whitening is the most effective way not only to restore the whiteness of your teeth but to it's maximum potential in a procedure that last less than an hour and causes no pain to perform. Through the aid of lasers and modern bleaching solutions, you can remove stains and discolouration to achieve a whiter smile and increase confidence. Laser tooth whitening has achieved the best results in dramatic shade improvements.

SCALING

An ultrasonic water device is used to gently rid your gums and teeth off debris, thus cleanse your smile, stimulates circulation, and massage your gums all at the same time. This procedure lasts less than 30 minutes and great to combine with other treatments.

FRESH BREATH CLINIC

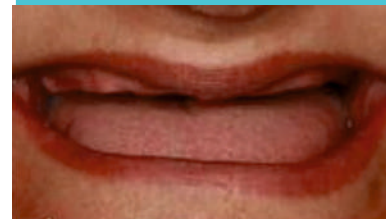

Do you yourself avoiding close contact with others, just in case?

What about social situations at work, shopping, parties, dates, family functions - do you dare to get close? Or do you hold back, unsure of your breath? We have solution in our fresh breath clinic.

ADHESIVE RESTORATION

The era of amalgam fillings are over! Healthier, stronger, and more aesthetic modern tooth coloured materials are available to improve your smile and health concerns have replaced unsightly silver amalgam fillings.

Before

After

BPS DENTURES (BIO FUNCTIONAL PROSTHETIC SYSTEM)

Do you have following problems with dentures?

- 1. Loose fitting lower dentures
- 2. Unable to chew hard food
- 3. Unable to speak clearly
- 4. Unable to smile confidently

Then we can offer you BPS dentures.

BPS dentures are made with systematically coordinated materials and techniques from world class manufacturer to suit the individuals intra oral condition appropriately . BPS denture reproduces the functions of the natural teeth during mastication and speaking to a very high extent . The patient will get a well fitting denture which is stable during functions like chewing, eating and speaking. A genuine BPS denture have a BPS logo incorporated in the denture. The dentures are processed using continuous injection moulding technique with high fracture resistance and the best clinically approved material.

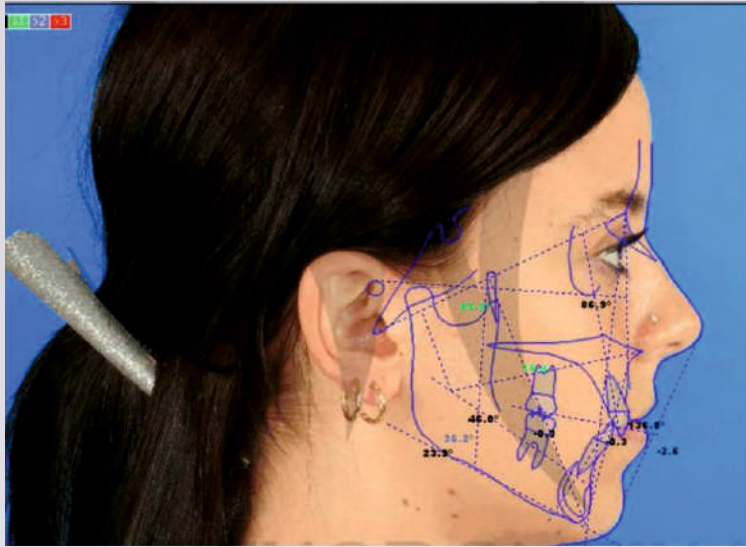

SMILE DESIGNING CLINIC

Appealing smile can be beginning of a happier, more successful life. Designing your new smile is the first step in this venture. Kailas Super Speciality Dental Clinic provides a personal smile design for each of our cosmetic dentistry patients. Our smile designing begins with an examination of your lip line, facial shape, jaw angle and eye symmetry. we can create a beautiful smile as little as a day or two.

CLINICS FOR NRI's AND FOREIGN NATIONALS

Non-resident Indians are often deprived of speciality dental treatment due to shortage of time during their vacation in India. Our NRI department is well equipped and well manned to treat them with fewer appointments, assuring quality treatment at no extra cost. This facility is well appreciated and used by NRI's and many visiting foreign nationals. Prompt reference could also be arranged to the country they come from.

NEMOCEPH:

The standard in Computerised Cephalometry

The tool that provides the widest number of choices for diagnosis, Treatment and case presentation in Orthodontics

PAEDIATRIC DENTISTRY

We all love to give the very best to our kids, Kailas has it all when it comes to paediatric dentistry

CLEAR ALIGNER

AN ELEGANT WAY OF TOOTH CORRECTION IS NOW IN INDIA

ചികിത്സയ്ക്ക് മുമ്പ്

7 മാസത്തിന് ശേഷം

WHAT IS CLEAR ALIGNER?

It is a splint made out of a clear transparent material that controls the tooth movements.

With the CLEAR-ALIGNER you will be unaware of its presence, giving you a good and confident feeling, and other persons will hardly notice that you wear a splint.

Transparent: The CLEAR-ALIGNER-Splint is a highly transparent splint, nearly invisible

Comfortable: No Pain. Has no effect on speech and laugh. High-quality splint gives a good mouth feeling. It is smooth without clasps, screw or brackets

Removable: You can remove and reinsert the splint easily at anytime ie, before eating and cleaning.

Hygienic: The hygienic care of the CLEAR-ALIGNER Splint is easily done with tooth paste or tooth brush.

Effective: The treatment with the splint leads to optimum and precise results in short time. Monthly check-up can be avoided.

Reasonable: Very much reasonable than any other transparent orthodontic therapy.

Consult your Dentist or Orthodontist

Discuss a possible treatment with the CLEAR-ALIGNER-System.

Treatment

During the wearing period, dentist or orthodontist will control the treatment results regularly and will take new impressions from time to time for reaching an optimum result. THE CLEAR-ALIGNER splint guarantees a good, nearly familiar mouth feeling
Consult your Doctor for more details.

കമ്പിയില്ലാത്ത ദന്തക്രമീകരണ ചികിത്സ ഇന്ത്യയിലും

വിദേശങ്ങളിൽ മാത്രം ഉപയോഗിച്ചുകൊണ്ടിരിക്കുന്ന കമ്പിയോ ബ്രാക്കറ്റോ ഉപയോഗിക്കാതെ യുള്ള ക്ലിപ്പ് ചികിത്സ ഇപ്പോൾ ഇവിടെയും.

എന്താണ് ക്ലിയർ അലൈനർ ?

നേർത്തതും സുതാര്യവുമായ പോളികാർബൺ ട്രേ ഉപയോഗിച്ചു പല്ലിന്റെ ചലനം നിയന്ത്രിക്കുന്നു. വ്യക്തവും കൃത്യവുമായ ചലനം ഈ രീതിയിൽ സാധിക്കുന്നു. വളരെ എളുപ്പവും ഊരിമാറ്റാവുന്നതുമായ ക്ലിയർ അലൈനർ പല്ലിന്റെ മുകളിൽ ഒരു സുതാര്യ ആവരണം പോലെ നിൽക്കുന്നതുകൊണ്ട് ക്ലിപ്പ് ചികിത്സ നടക്കുന്നതായി മറ്റുള്ളവർക്ക് കണ്ടുപിടിക്കുവാൻ പ്രയാസമാണ്.

നേട്ടങ്ങൾ:

ചിരിക്കുമ്പോൾ പെട്ടെന്ന് കാണാൻ കഴിയാത്തവിധം സുതാര്യമാണ്.

വേദനയില്ല. പല്ലിന്റെ ശുചിത്വം ഭംഗിയായി നിലനിർത്താം.

മെറ്റൽ പാർട്സുകൾ ഒട്ടിച്ചുകൊണ്ടുള്ള അഭംഗി ഒഴിവാക്കാം.

പ്രതിമാസ പരിശോധനയിൽ ഇളവ്

മറ്റ് ദന്തചികിത്സയ്ക്ക് തടസ്സമില്ല.

ചികിത്സാ സമയലാഭം. തീരുന്ന സമയം മുൻകൂട്ടി അറിയാം.

നേർത്തതും സുതാര്യവും ഉപയോഗിക്കുവാൻ എളുപ്പവും. എടുത്തു

മാറ്റുവാനും വൃത്തിയാക്കാനും എളുപ്പം.

വ്യക്തവും കൃത്യവുമായ ദന്തക്രമീകരണം കുറഞ്ഞ കാലയളവിൽ

പൂർണ്ണമായും നിങ്ങളുടെ സഹകരണത്തോടെ.

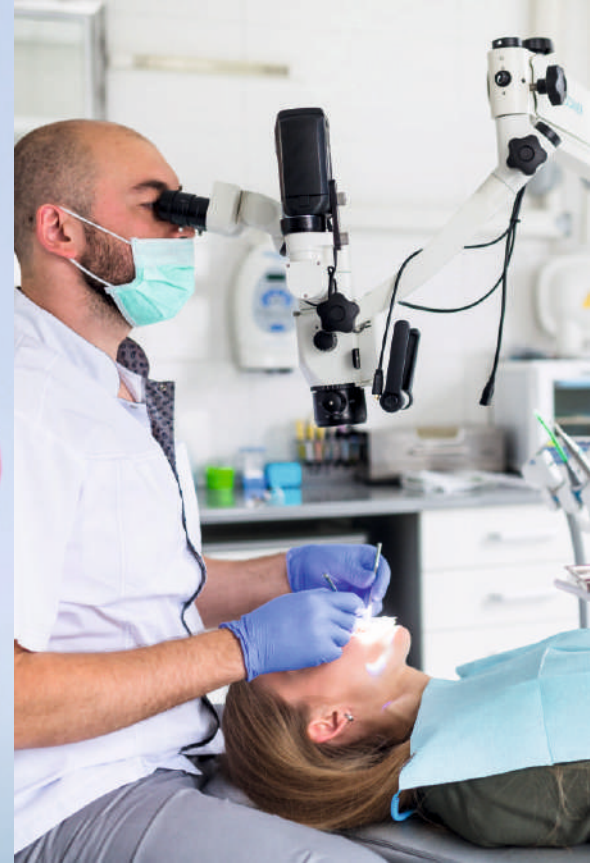

ശിശു സൗഹാർദ്ദ ദന്താശുപത്രി

കൈലാസ് ദന്തൽ ക്ലിനിക്കിൽ രണ്ട് ശിശു ദന്തരോഗ വിദഗ്ധരുടെ നേതൃത്വത്തിൽ സുസജ്ജമായ കുട്ടികളുടെ ദന്തരോഗ വിഭാഗം പ്രവർത്തിക്കുന്നു. പാൽപല്ലിൽ ഉണ്ടാകുന്ന പോടുകളുടെ വ്യാപനം നിയന്ത്രിക്കുന്നതിനും മറ്റുമായുള്ള topical fluoride application കുട്ടികളിലെ ദുശ്ശീലങ്ങളായ വിരൽ കുടിക്കുക, വായിൽകുടി ശ്വസിക്കുക, നാവും ചുണ്ടും കടിക്കുക തുടങ്ങിയവയ്ക്കുള്ള ചികിത്സകളും ലഭ്യമാണ്. വേദനയുള്ള പല്ലുകൾ എടുത്തു കളയാതെ നിലനിർത്തുന്ന pulpectomy / pulpotomy & crown പല്ലുകളുടെയും താടിയെല്ലിന്റെയും വളർച്ചയെ നിയന്ത്രിച്ചു കൊണ്ട് പിൻകാലത്ത് എല്ലാം പല്ലും ഉന്തിവരാതെയുള്ള preventive ചികിത്സകളും ലഭ്യമാണ്.

കൃത്രിമ വയ്പ്പല്ല്

ഊരി മാറ്റാവുന്ന രീതിയിലുള്ള കൃത്രിമ ദന്തങ്ങൾ മോണയുമായുള്ള പിടിത്തം കുറവയാൽ ഉറപ്പിരിക്കുകയില്ല. ഇതിന് പരിഹാരമായി implant supported denture ലഭ്യമാണ്. നഷ്ടപ്പെട്ട പല്ലുകൾക്ക് പകരം പൂർണ്ണമായോ ഭാഗികമായോ ഇളക്കി മാറ്റാവുന്നതോ ഉറപ്പിച്ചതോ ആയ രീതിയിൽ പൂർണ്ണമായും നാച്ചുറലായി തോന്നാത്ത വിധത്തിൽ പല്ലുകൾ പുനഃസ്ഥാപിക്കാവുന്നതാണ്. പല്ലുവയ്ക്കുന്ന ചികിത്സാ രീതിയിൽ (prosthodontia) പോസ്റ്റ് ഗ്രാജുവേറ്റ് ബിരുദധാരികളായ ഡോക്ടർമാരുടെ സേവനം ലഭ്യമാണ്.

Oral Care and Wellness Clinic

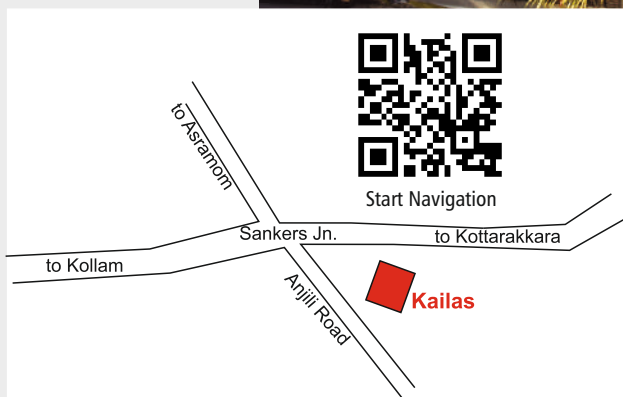

കൈലാസിലെ Oral care and wellness clinic ൽ ആറ് മാസത്തിൽ ഒരിക്കൽ നടത്താവുന്ന general dental checkup ലൂടെ നിങ്ങളുടെ നിലവിലുള്ള ദന്തരോഗത്തെ പറ്റി സൂക്ഷ്മമായി വിലയിരുത്താവുന്നതും ദന്തരോഗ പ്രതിരോധപാധികളായ Cleaning, Polishing, Dental Cavity കളുടെ മുൻകൂട്ടിയുള്ള നിർണ്ണയവും പ്രതിവിധികളും നടത്താവുന്നതാണ്. വായിൽ ഉണ്ടാകുന്ന വൃണങ്ങൾ നിറവ്യത്യാസം, തടിപ്പ്, നാവിലും കവിളിലും ഉള്ള എരിച്ചിൽ, നാവിൽ ഉണ്ടാകുന്ന പൂപ്പൽ തുടങ്ങിയവ വിലയിരുത്തുന്നതിനും വായിലെ കാൻസറിന്റെ മുൻകൂട്ടിയുള്ള കണ്ടെത്തലിനും ആറ് മാസത്തിലുള്ള ഈ checkup സഹായിക്കുന്നു.

Dental Treatment for medically compromised patients
